

Infrared Products... Creating a Buzz

Space age Fabrics that radiate Far Infrared:

By impregnating natural and man-made fibers with bio ceramic insulating powder, new fabrics have been developed. These materials are now being used in garments for people and horses,

Research shows these unique materials are very effective in relieving soreness and swelling.

Why is Prolotex™ so effective at relieving pain?

Short answer: Prolotex™ products ultimately increase circulation; reduce swelling, and relieve pain. That's the basics of what Prolotex™ can do for you, but there's more, a lot more...

Far infrared therapy improves both men and women's health. It's a safe alternative sports medicine compared to taking pharmaceuticals drugs. You don't have to worry about side effects, like you do with mixing of prescription drugs.

If you're showing symptoms of poor circulation, causing pain in the feet, legs, or hands, we suggest you try wearing Prolotex™ therapeutic socks, or gloves.

Optimum far infrared rays emitted by Prolotex™ products penetrate deeply and effectively, dilating blood vessels and tiny capillaries.

"I just have to let you know what a difference your socks made. One evening I was a bit exuberant in doing some stretching and woke up the next morning with severe pains in the front of my ankles and down my shins.

I could hardly walk down the stairs to get my new socks. I put them on and within about 20 - 30 min. was able to get around the house. The severe pain was reduced to a bearable ache and I was able to get through the day. I took them off in the evening and almost immediately the pain in the front of my ankles increased again. I can't tell you how your socks helped me. My only thing now is to have you guys make a longer sock that will cover my shins... up to the knee maybe like knee socks."

Thanks again for a great product. S. Neuman

An alternative sports medicine therapy proven to reduce pain, improve circulation and promote cell & nerve rejuvenation.

I purchased your therapy gloves several months ago to help with "trigger finger" in both hands. The gloves are wonderful! I work in a pharmacy with a huge customer base.

Many of my customers have asked about my gloves and where I got them. I have referred several people to your website. If your orders increase from the Salem/Roanoke area of Virginia, send me a smile! Thanks, Martha W.

Athletes previously used wraps made of myelin or rubber to achieve similar benefits. However since such materials fail to breathe well, skin inflammations often resulted. In contrast, **Far Infrared** products maximize body sweat, while simultaneously preventing muscles from feeling over-worked. In time these gloves & socks will noticeably improve muscle tone. By using an assortment of body thermal socks during competitions or training, athletes have been able to eliminate soreness and muscle spasms while reducing the likelihood of future injuries. Fir Products help mend injured or over-used muscles, tendons and ligaments.

How to wear Prolotex™ Products:

Wearing Prolotex™ with direct skin contact for 24 hours a day will produce the most beneficial results. Wear Prolotex™ products as often as possible until ailment subsides. If the ailment persists consult your physician.

Prolotex™ will also help with weight loss by increasing your metabolism. Burn more calories and flush "nasty" toxins to improve your health.

Prolotex™ products for Better Health

Prolotex™ products have been shown to penetrate through the skin layers, deep into the tissues. By stimulating micro vibrations initiate a thermal reaction to elevate tissue temperature. The body reacts to this by dilating micro vessels and major blood vessels to improve micro and macrocirculation, revitalizing tissues and promoting healing and regeneration.

In addition, the thermal action helps to keep the wearer comfortably warm in cold temperatures.

Prolotex™ products can be used to relieve pain associated with the following ailments:

- Arthritis, rheumatism
- Circulatory problems
- Carpal Tunnel Syndrome
- Finger Joint pain
- Strained Tendons
- Numbness of extremities
- Sport injuries
- Trigger Thumb
- Foot cramps
- Raynaud's Syndrome
- Tarsal Tunnel Syndrome

Prolotex™ products have shown positive results for:

- Arthritis Sufferers
- Finger Pain
- Blackberry Thumb
- Foot Cramps
- Increased hand strength

Releasing toxins stored in the body

Prolotex™ specially designed thermal wraps help accelerate the body's own **natural healing process** and may actually minimize scarring. Prolotex™ **Far Infrared** wraps worn during exercise help increase sweating, removal of lactic acid, and breakdown of fats and toxins.

I was dealing with a lot of nighttime discomfort from CTS, in fact several times a night I would get out of bed to massage my hands and swing my arms around in an attempt to restore normal feeling. It was not only a bother for me, but for my wife as well.

The very first night I used my Prolotex gloves the change was, and I really do mean this, miraculous. The pain and discomfort were gone! Furthermore I am happy to say it has been that way EVERY night since. This is a totally unsolicited and honest testimonial.

Steve Allen Birmingham, MI

Prolotex™ Far Infrared garments are impregnated with a special patented formula of bio-ceramics that emit natural healing far infrared energy into your body. Prolotex™ products are comfortable to wear next to your skin, stay fresh longer (FIR retards bacteria) and “give” a bit for a better fit.

Fabric Structure:
Woven polypropylene and polyurethane materials impregnated with micro-particles of lead-free ceramics.

Fabric for Bands & Socks:
80% polypropylene
15% spandex
5% bio ceramics.

Fiber Content for Gloves
95% polypropylene
5% bio ceramics

Washing Instructions:

- Hand wash or gentle cycle in cold water (below 15°C or 60°F).
- Detergent or mild soap can be used.
- Air dry in room temperature. Avoid heat or direct sunlight
- No dry cleaning, ironing or bleaching.

Protection against Electromagnetic energy fields

In this new information age, we are literally surrounded by a multitude of electrical devices. Our home, work and entertainment environments are filled with helpful appliances and electronic gadgets that enrich our lives. But new scientific evidence suggests that the ELF (extremely low-frequency) magnetic fields given off by these devices can be of sufficient strength to be considered potentially hazardous.

Prolotex™ FIR body garments can help to protect, maintain, and realign your body's natural electromagnetic energy fields. Offering you protection from harmful “ELF” and at the same time boosting your immune system and improving your overall health.
